Connect | E-Seed

# Hardware Solutions

## iPad Variable Rate Solutions - Streamline your precision farming operations

Connect and E-Seed are low cost solutions that have been designed to simplify precision farming. The iPad apps not only allow you to seamlessly and instantly send variable application maps created in Omnia to the field, but also control the machines as well.

- › Cost effective
- › Intuitive
- › Greater control
- › Wireless data transfer
- › Improves efficiency

The system has been fantastic - I would not want to go back to how we were doing it before.

Jonathan Roberts – Morley Farm

## Connect

**Omnia Connect is a simple to use variable rate control system that upgrades your existing serial controller.**

Compatible with a wide range of machinery. Visit the Omnia website for a full list of compatible machines.

## E-Seed

**Convert your seed drill to variable rate control using the Omnia E-Seed drill conversion kit.**

The kit contains an electric motor which replaces the land wheel and can be easily fitted to any seed drill, irrespective of age.

Upgrade your existing seed drill without investing large amounts of money in a replacement machine.
